

DANIEL CZARNIEVICZ

I am interested in challenging Data Science and/or Data Analytics positions with a special focus on those positions that will require the development of Machine Learning algorithms and/or the construction of data analysis apps and dashboards. I am very experienced with R and SQL and have worked with Python and web technologies too.

I hold dual Uruguayan and Polish citizenship and I'm willing to relocate to other countries in Latin America or Europe. You can find out more about me in my [web page](#) or my [GitHub](#).
