DANIEL CZARNIEVICZ

I am interested in challenging Data Science and/or Data Analytics positions with a special focus on those that will require the implementation of Machine Learning models and/or the construction of data analysis apps and dashboards. I am very experienced with R, SQL, and Git/GitHub and have worked with Python and web technologies too (HTML and CSS).

I hold dual Uruguayan and Polish citizenship and I'm willing to relocate to other countries in Latin America or Europe. You can find out more about me on my web page or my GitHub profile.

🎓 EDUCATION

BS in Statistics
2021 | 2016
Udelar
📍 Montevideo, UY

· Average: 8.43

BLOG Y COMMUNICATION

2021
|
2020

UnaImagen.uy

· Along with other economists, we created a blog where we post data
visualizations about Uruguay. Our goal is to make available data that
contributes to the public discussion and the national policy debate.
